requirements or by religious observances. They do much to break the monotony and to provide a change.

HOUSEHOLD ARTICLES AND UTENSILS. Beds and cots are seldom, if ever, found in Kol houses. Those who dwell near cities, or work in the industrial centres sometimes own a cheap rope cot called a *khatiya*. The head man of the village may own a cot or two, and when one visits a village, this is often brought for the European guest to sit upon. The usual place for sleep is the mud floor of the dwelling. A blanket or mat may be all that is underneath, while in the hot weather not even this is availed of. Pillows are not used, but if it should be desired that the head be raised, it is probable that a small wooden stool a few inches high will be employed.

Fig. 5

Chairs, tables and the like, are never found. Anything that must be put away and cannot be hung over the rafters or the bamboo poles stretched across the walls is placed in a wooden chest. One usually finds some kind of a small box about the place which is locked. Valuables, however, are usually buried in a hole in the floor and the same completely *lepoed* to hide all trace of the spot.

The main articles in the house are those connected with food and drink. Gourd vessels are occasionally used as receptacles for storing water, but more commonly such vessels are made of earthenware or brass. Kols do not make either of these. The earthen vessels may be purchased cheaply in the bazaar from people of the Kumhar caste—the traditional potters. Food is also stored in them and in one of the Kol sub-divisions, the *Kurhas*, food should only be taken from a particular type of black earthenware dish. As a rule the various kinds of earthenware vessels are being replaced all over village India by those made of brass and aluminium.

The stone implements are the grindstone and the *sil*. The former consists usually of two pieces of round stone, although the bottom stone may be squarish. The upper stone, which is slightly smaller, is about 16" in diameter. It has a peg for a handle by which it is rotated. There is also a hole into which the grain is poured, though often the stone is simply lifted and the grain spread out over

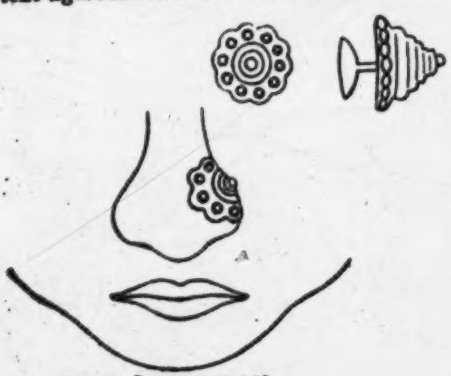
273 [443] feasts or religious observances they go to the toddy shops. Here they may secure the following types of intoxicants: From Indian sources liquors from the Mahua tree (*Bassia latifolia*); the toddy palm (*Borassus flabellifer*); the date palm (*Phoenix sylvestris*) and the sago palm (*Caryota urens*). Cheap "foreign" liquors may be bought too, and a [439] bottle of cheap wine may be used at the time of worship; but as a rule they do not resort to these on account of their being relatively more expensive.

301 PERSONAL DECORATION. Kol men do not wear much in the way of decoration. In their case most ornaments are purely amulets. The Thakuriya Kol often wears a bit of gold about its person, usually in the form of an ear-ring.

Kol women are fond of decorations and there are many kinds of cheap jewellery available with which they often bedeck themselves. There is usually found a gold nose decoration fitted into the left side of [304] the nostril which had been pierced when the woman was quite young. The text figure shows one of these, which is said to have cost Rs. 4-3-0. There are generally some ear decorations as well. These take various forms and are of both silver and gold or sometimes of cheaper materials. On the arms above the elbow one may find a silver bangle, and below the elbow several silver bangles, between them, however, being yellow and red lac bangles. The lac bracelets are bright and pretty, and they also serve the purpose of keeping the silver bracelets apart, for the rubbing wears down the silver. Often between the silver and the lac bracelet there is a silver bracelet entirely wrapped with thread or string in order to keep the silver bangle next to it from rubbing against anything.



NOSE DECORATION

Fig. 11

The head is decorated with hair chains, and sometimes the ear-rings have a string of coins attached to them. Around the neck is often a plain silver ring.

For the legs there are anklets or ankle bracelets. These are

liGriffiths M-5 (ca. 1940) 1946 AW37 Kol AW37

This led to a separation between the brothers and they formed two divisions of the same family. The elder brother was the head of the family of Rautiya Kols and the younger of the Kurha Kols. 564 773

Another story relates that there were once five brothers of the same *kurhi*. Due to lack of food they were forced to separate: one went to the Binj mountains and founded the Binj *kurhi*; another went to a Thakuriya house, found shelter there, and from him are descended the Thakuriya Kols; another who took refuge with the Kumhars, the potters, was the ancestor of the Kurha sept. It is not unlikely that these stories contain the truth that this *kurhi* may have arisen from some marriage with Kumhars or perhaps miscegenation with them, or it may have reference to some occupational adventure on the part of some Kols.

Apparently the use of an earthen vessel by one sub-group does not prevent marriage within the whole group, nor does it limit it to that group, for marriages are possible between them and the Kathautiya Rautiyas who use wooden vessels from which to eat. There is the restriction, though, that Kurhas and Kathautiyas should not eat together unless they are related by marriage, and when this is the case they may compromise by the use of the ordinary brass plate. In a certain centre we were told that the only "pure Rautiyas" were those who used the *kurha* and that there were also definite marriage restrictions between them and the users of the wooden bowl. This, if ever true, is disappearing. 564 [264]

1c. *Kathautiya*. Evidence goes to show that this *kurhi* is also a sub-group of the Rautiyas and differs from the Kurhas in that its members eat from a wooden bowl, called *kathauta* or *kathota*. The women folk, and occasionally the men, wear bits of wood in the lobes of their ears. During childhood the hole in the lobe is enlarged by the insertion of fibres from weeds, and from time to time a new bit is inserted in the attempt to enlarge the hole. We did not find that the Kathautiya Kols were consistent in the use of the wooden dish. At Sihora they told us that while they were Kathautiyas they had nevertheless given up the use of the *kathauta* and had adopted the ordinary brass plate. In other centres, notably one near Katni, they still use the bowl and cling to the custom tenaciously. As far as possible, they declared, all food should be prepared in wooden vessels, and it is expected that they should eat their food from such vessels. They do not manufacture their own *kathautas*, nor is any particular kind of wood used, but the dishes are made by Hindu carpenters from such wood as is available. At the time of death or eclipse of sun or moon the Kurha Kols must throw out all their earthenware dishes; the [415 264] [304 301] [178] [184] [252] [439] [82] [768 415]

Occupation.	*How Divided.*
Playing musical instruments.	Men only.
Dancing.	Women only.
Sacrificing an animal.	Men only.
Hom sacrifice.	Usually men, but women may.
Making blankets, clothes and gourd vessels.	Neither ever make these except Kathariyas make mattresses.
Making *lathis* of bamboo.	Men only.
Weaving mats and making leaf plates.	Neither makes these: are purchased as needed. [439]
Counting *biri* leaves.	Both men and women.
Keeping watch over crops:	
By day.	Do, but generally men.
By night.	Do, but generally men.
Bringing water from the well.	Men only.
Cleaning up the toilet of children.	Both men and women.
Husking of paddy.	Women only.
Cutting wood for home use.	In charge of men.
Gathering cow dung.	Usually men, but women may do.
Weeding the paddy field.	Women only, and children.
Reaping the paddy or wheat.	Both men and women.
Washing plates after meals.	Do.
Washing clothes.	Women.
	Each wash their own, except that women wash the children's. [296]
Making fireplaces.	Women only.
Bringing fruits from the forest.	Both men and women.
Gathering roots for eating.	Do.
Care of chickens.	Usually women, but there are exceptions.
Care of goats.	Both men and women.
Weaving of cloth.	Neither does this work.
Selling of excess grain.	Men in charge of this.
Construction of houses.	Men, with the help of women who must stay on the ground.
Milking of cows.	Usually men, but women may assist. [234]
Milking of goats.	Do.
Sweeping of houses and open courtyards.	Women only. Bachelors.
Throwing out of trash.	Do.
Bringing mud to repair walls.	Both men and women.

463 177 Our own investigations show that the Kols enter into the modern economic world more easily than other primitive tribes such as the Gonds. While there are scores of Gond villages in and around Jubbulpore, the Gonds are shy and retiring and are only seen in the town on bazaar days when they come to buy and exchange some of [156] their forest produce. The Kols are not bad mixers, seem to like company, and have entered into the industrial life of the city quite readily. We did not find the Kols limited to any particular occupation. 463 They are unusually good workers and wherever we went we found [427] this fact mentioned about them. We found a few who are farmers and who hold small pieces of land from the *malguzar*. Others are farm workers and follow the crops; and during the time of the wheat harvest some Kol villages and *mahallas* are almost entirely deserted. Many of the Kols living in a town not far from Jubbulpore are road-workers, breaking the stone for the roadway and doing the required [439] labour in repairing it. Others in Barela burn and sell charcoal; some Kols buy wood from the Gonds, cut it into convenient lengths and resell it in Jubbulpore. In Kharara Ghat, a purely Kol village about eight miles from Jubbulpore and quite inaccessible and isolated, the [427] Kols seem independent, raising all their own food-stuffs and paying their *malguzari* rents by means of the proceeds from the sale of wood [276 824] and of the leaves of the *tendu* plants (*Diospyros embryopteris, melanoxylon, montana, etc.*), used in the manufacture of country cigarettes or *biris*. No one in this village was said to be engaged in hard labour [461] for others, known as coolie work. In other places we found indication that they can quite readily turn their hands to mechanical work. A few are so engaged in the factories in Jubbulpore. We watched Kols

prepare tiles in a workshop near Deori; a Barela Kol has taken up the work of a mason and bricklayer. In another family we found that members had been jungle postal-runners for three generations. In Sihora they said that their chief occupation was digging in the fields, though they also cut wood and sold grass; only one or two rented lands. At Katni we found that they were chiefly employed in the cement works, but would soon be going elsewhere, as the cement factories were in the process of closing down. In some of the villages about Katni they were found to be mostly labourers in the surrounding fields. At Kymore thousands are employed in the great cement factories; at Maihar they are mostly engaged in lime-kiln work. Near Rewa City they seem to be mostly serfs and labourers. Further north they grind sandstone for the glass works, and at Chunar in the United Provinces help to dig the rock out of the hillsides. We found a few literate Kols in Katni who had learned to read in the Church Mission School. One of these was a clerk in a warehouse at busy times of the year; the rest of the year he would do whatever he could find which often was nothing but coolie work.

THE SITUATION IN THE VILLAGES: *Land and Income.* In our visits to numerous villages we made enquiries as to the economic situation on the part of the Kols living there. A careful survey was made near Jubbulpore. Text figure 30 shows the area. Only a few Kols in the large group at Barela actually rent lands for farming purposes; either on shares or on straight rent. In Kharara Ghat the situation seems to be the opposite, for nearly every household there holds land from the *malguzar*. Money is earned on the side from the sale of wood, grass and *tendu* leaves for *biris*. In Barela a survey of thirty-nine families indicated that only three held lands, and that the total acreage so held was but 5½ acres. Thirty families in Kharara Ghat hold 82 acres of land; in some cases taxes for the same are paid direct to the Government, while to the *malguzar* they say they pay Rs. 10 per *khandi* of wheat sown, this being considered as 1/3 the produce of the land.

Barela Kols do most of the coolie work on the roads near that place and also labour on the farms as occasion offers. All the able members of the family work and we found that on the average the family income was Rs. ten to twelve per month for this type of labour. One dealer in charcoal said that he cleared locally in Barela about Rs. 120 per year. Another Barela Kol has the custom of purchasing wood from the Gonds who bring it down from the hills near-by. This is bought for five pice, is then cut up into shorter lengths by himself

464 and family and is resold for ten pice, just double the amount he paid
434 for it. Another Kol, acquainted with brick-laying and general re-
[439] pairing, earns twelve annas per day when work is available. A few
in Barela deal in *tendu* leaves and sell the same to contractors from
[556] Jubbulpore. There was only one Kol in Barela whom the other Kols
considered wealthy. "Wealthy" was defined as the possession of
ornaments, animals, and some money. The rent for land about Barela
[427] varies considerably as it is not all of equal value. Two Kols, however,
were payng at the rate of Rs. 4-10-0 per acre.

333 At Deori we found that the Kol colony was mostly employed in
464 the tile factory where they are paid by piece work and receive
434

1:Griffiths M-5 (ca. 1940) 1946 AW37 Kol AW37

cut in this forest and carried to Jubbulpore where it is sold to customers among the military folks living on the Ridge. In this way three to four annas per trip are earned. The Kol who takes wood from the reserved forest must pay two pice for each load carried on his head out of the forest.

The cutting of grass during the rainy season is another source of income for this village and a good load of grass, such as may be carried on the head, will bring from three to four annas in Jubbulpore. Gardening would be possible along the banks of the river but they do not do any there. What gardening they do is limited to the manure pile where pumpkins and the like are allowed to grow. There is an occasional hunt with dogs and torches, mainly for hares which stand and watch the light and are either clubbed to death or caught by the dogs. There were no guns in the village, nor did they use the bow and arrow. Although they live right beside the river fishing is not common. Sometimes fish are cornered in shallow water and caught with strips of cloth.

In our visits to Kol villages we also went to numerous bazaars. The bazaar is usually a weekly feature and there is a definite rotation from village to village. In all our inspections we did not find anything for sale in the weekly bazaars which had been brought there by Kols. Any wood, grass, eggs or the like, which they do sell are sold privately to individuals.

Animals. Whenever possible Kols keep animals such as cows, bullocks, goats and chickens, but unless they are rather independent economically not many are found to own cattle. Out of twelve Kol families studied in Barela only four owned cattle: five bullocks, two cows and two calves. Most of the families had a few chickens. Dogs and cats are found in Kol villages but they do not seem to be owned by individuals, belonging rather to the whole village. No swine were kept in Barela, nor by any other Kol community which we studied. Some intimated that in the years that were past swine were kept but that they gave it up so as not to offend their Hindu neighbours. Kols never keep donkeys nor horses. One Kol in Barela wanted to purchase a pair of bullocks, and to do this went to a bazaar in Panagar a distance of twenty miles away, where he got one for eight rupees. A few days later he purchased another from a nearby Gond village and paid twelve rupees. Neither was a very good specimen.

The survey of Kharara Ghat indicated that there they owned 35 bullocks, 73 cows, 43 goats and about 200 chickens. In our investigations we found only one or two Kol families owning buffaloes; their cost and care is far too much for the average Kol. Eight out of the thirty
